Experience

Applied ML Engineer - Forte	May '25 - Aug '25
<i>Python / Forte / Data Analysis / ML Pipelines</i>	
- Developed end-to-end ML workflows for data ingestion, transformation, modeling, and evaluation. - Applied hypothesis testing and statistical analysis to validate model behavior. - Built anomaly detection and clustering systems to identify patterns in complex datasets. - Performed feature engineering and dimensionality analysis to improve performance. - Designed reproducible experiments and documented results for iteration.	
Applied Data Scientist - WordLoot	Nov '25 - Present
<i>Python / Data Analysis / Experimentation / Modeling</i>	
- Designed data-driven systems for prediction and outcome evaluation in an interactive, probabilistic environment. - Analyzed user interaction and historical event data to inform scoring, weighting, and optimization logic. - Built feature pipelines from transactional and event-based datasets. - Evaluated system behavior using statistical analysis, simulation, and performance metrics. - Iterated models and system parameters based on observed user behavior.	

Achievements

Airbnb Host & Operations Manager - 5 Star Rating
- Manage end-to-end guest operations including communication, booking logistics, issue resolution, and post-stay optimization. - Maintain a consistent 5.0★ rating through structured guest messaging workflows and rapid response systems. - Designed automated backend processes for scheduling, cleaning coordination, pricing optimization, and review management. - Implemented operational tracking systems to monitor guest satisfaction, turnover efficiency, and property performance. - Built standardized response templates and decision frameworks to ensure consistency and scalability. - Optimized listing performance through data-driven pricing adjustments and occupancy analysis.

Skills

Programming	ML	Version Control
- Python - SQL - Java - Bash	- Predictive Modeling & Statistical Analysis - Hypothesis Testing & Model Evaluation - Regression, Clustering - Anomaly detection - Simulation & Expected Value Analysis - Exploratory Data Analysis	- Git - GitHub - Reproducible Pipelines

Education

Bachelor of Science - Computer Science Cleveland State University - Cleveland, OH	Grad. Spring 2028
Associate of Science - Computer Science Cuyahoga Community College - Cleveland, OH	Grad. Spring 2026
